- ✓ Elastic
 - Elastic scaling of compute and storage without downtime
 - 99.995% availability, less than 30 minutes planned or unplanned downtime per year
- ✓ Secure
 - Hardened database configuration, encryption everywhere, strong user authentication, monitoring and auditing

ADWC Oracle Autonomous Data Warehouse Cloud

Oracle **Autonomous Data Warehouse Cloud** makes available a highly scalable solution to customers with the ease, simplicity, high-performance and security, value that only Oracle can deliver. With Oracle, customers have deployment choice, and can preserve their existing investment while enabling new monetary opportunities for their most valuable asset - their data.

Oracle Database 18c

Oracle Autonomous Database Cloud is powered by the next generation of the world's #1 database, Oracle Database 18c. Oracle Database 18c delivers breakthrough automation capabilities, as well as greatly enhanced OLTP, analytics and consolidation technologies.

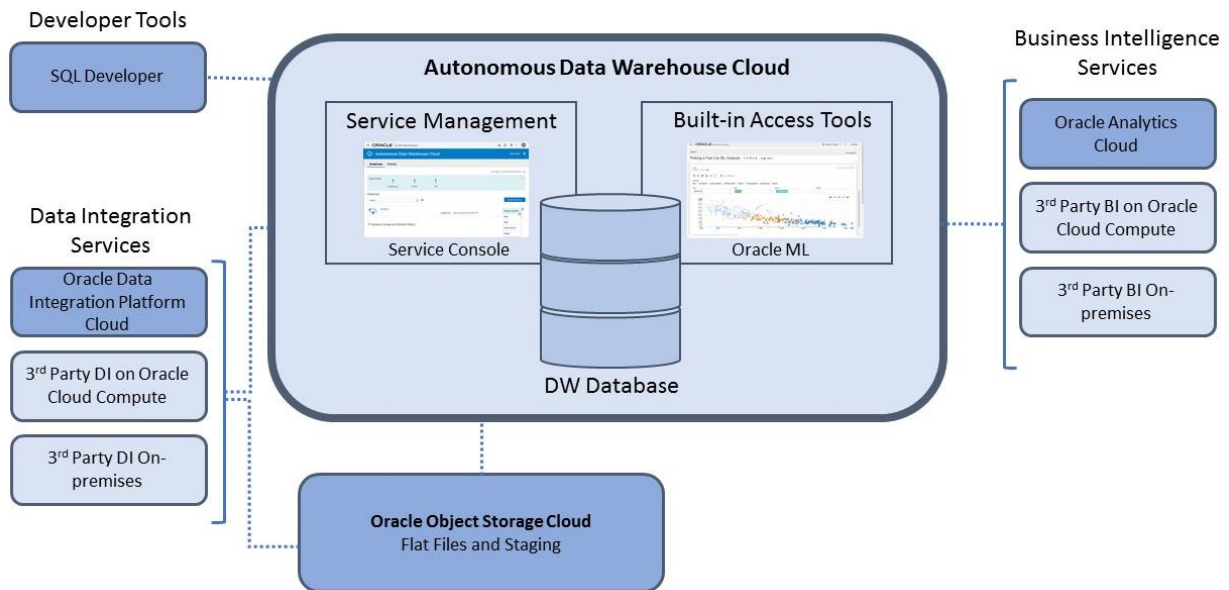

Integration

This fully integrates Autonomous Data Warehouse Cloud with Oracle Analytics Cloud using Oracle Data Integration Platform Cloud. **End-to-end**

Options

There are a number of delivery options available including Fixed Scope Offerings (FSOs). We are happy to share and step you through these FSOs at your convenience.
