TRAINING

## How does **OAC** compare to **other Business Analytics** services?

- ✓ OAC offers a customer-managed version of DVCS and BICS, as well as including Oracle Essbase, a new Cloud service, and Oracle Day by Day, a new native mobile app.
- ✓ If you use DVCS or BICS, you will find those services in OAC services to be almost exactly the same, but with additional functionality.
- ✓ If you use Oracle Essbase On-Premise, you will find Oracle Essbase in the Cloud to be similar but not identical, as the Cloud solution is wholly new and includes features not available On-Premise.
- ✓ Oracle Day by Day is a new native mobile application that leverages data in BICS together with machine learning to deliver proactive insights.

# OAC ORACLE ANALYTICS CLOUD

OAC can be used as a standalone cloud analytics solution or in parallel with other prior Oracle Analytics solutions. If you currently use OBIEE, Essbase, DVCS or BICS, you may want to continue using those services and also use OAC, or, you may want to consider moving your analytics entirely to OAC.

### The Cloud

OAC enables you to leverage Big Data architecture, EPM integration, support agile development and improve time to value **rapidly** on your analytics investment.

Cloud is accelerating the adoption of Analytics in all scale enterprise.

### Services

We have a range of Fixed Scope Offerings (FSOs) to Expedite time to value and Accelerate Delivery Times and Deliver Value **rapidly**.

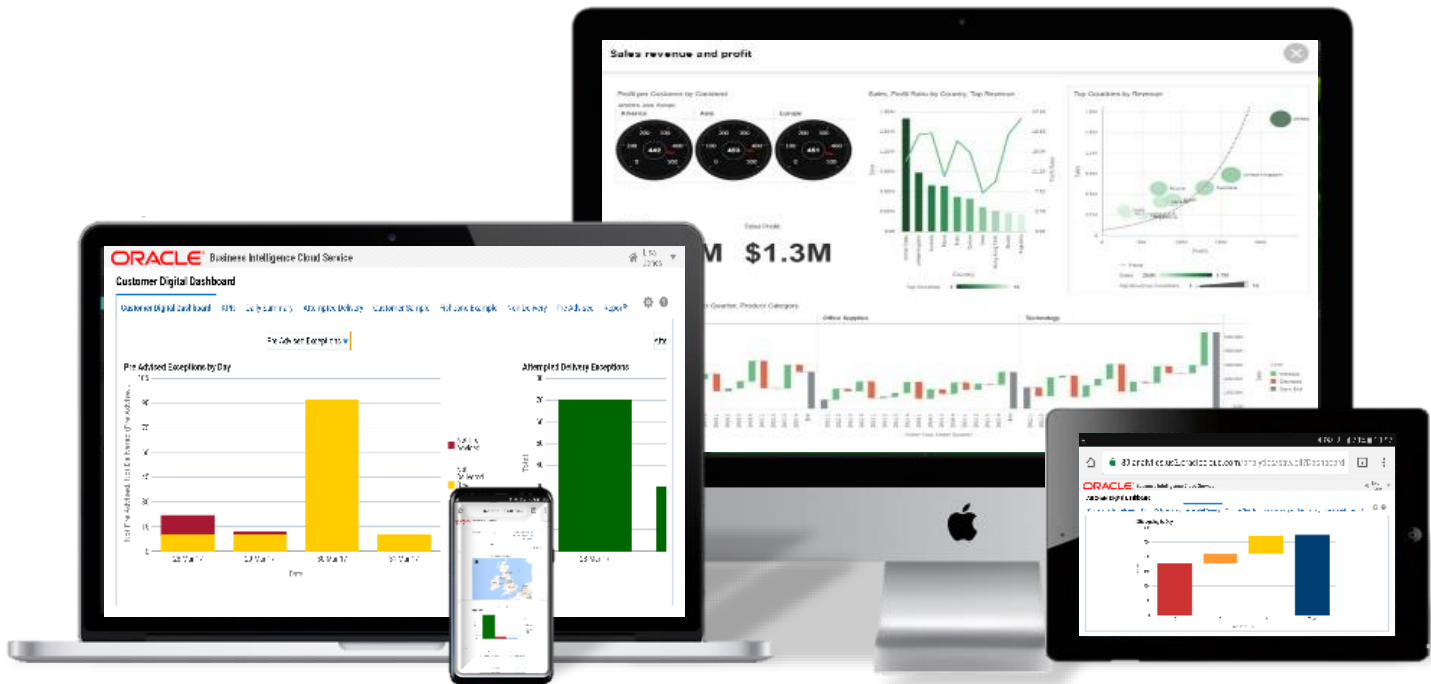

<b>Silver</b>	6 weeks
<b>Gold</b>	8 weeks
<b>Platinum</b>	12 weeks

### Options

We can **quickly** provide quotations based on FSO.

We can facilitate multiple payment methods, and we can enable Oracle Financing to encompass both Subscriptions and Services in a payment package.
