CLOUD

ORACLE® + NETSUITE
SOLUTION PROVIDER

NetSuite THE WORLD'S NO 1 CLOUD ERP SOLUTION

NetSuite empowers businesses of all sizes, across all industries to unleash innovation and growth. Built on a single platform and a single database means your entire ERP system is always connected and that your CRM, financials and inventory are all in one place. NetSuite's Suite Cloud platform supports proven application customisation to adapt NetSuite to your needs – no matter how you customise, you'll always be running the latest version. With multiple data centres, automated data backups and a stringent Service Level Commitment, NetSuite provides infrastructure that is more robust than typical on-premise deployments. All too often, SMEs use non-integrated solutions for fear of incurring excess costs. Not with NetSuite! Don't hesitate to contact us to discuss this solution and to find out how we can help you.

The Cloud

The Cloud is accelerating the adoption of Enterprise Resource Planning (ERP) applications - over 40% of the organisations that have ERP applications in the Cloud today did not have these integrated applications previously on-premises.
